WINDOWS & DOORS®

COLOURS AND TEXTURES

Ultimate Customisation

Hand-coated premium powder coat finish

Powder Coating

Rylock products are custom made to enhance a home's unique architectural style. Window and door frame colour should be considered alongside the remaining building materials during product selection.

Featuring 30 standard colours and textures, Rylock's aluminium frames are powder coated in-house, by hand to deliver the highest level in quality control to withstand Australia's local climatic conditions. The 7 stage pre-treatment process ensures an optimal bond with the aluminium and Rylock's semi-automated powder coating process was independently tested by CSIRO for durability.

Colours & Textures

The colours and textures range includes traditional tones, contemporary metallics and ColorBond™ favourites, which can be selected to match or contrast with other accent colours throughout the home. Textured coatings are available in Black, White, Silver, Monument and Surfmist. The Interpon Textura™ range offers additional depth and character, combining visual (colour) and tactile (texture) design elements to reinforce a design aesthetic which is complemented by superior anti-mar protection.

Rylock Metallic Silver

Rylock offers the highest level in quality control, to deliver products which withstand Australia's local climatic conditions.
